ABOUT US

Sarason is one of the most trusted technology names in the United Kingdom. With more than a decade of experience in the bathroom TV and outdoor TV industry, our expert team has the skills and knowledge that you need when choosing a waterproof TV. Based in the UK with partners in Singapore, we are poised at the forefront of this exciting technology. Call or email us today.

**Transform
your bathroom
with a water-
proof TV.**

Sarason creates stunning custom waterproof TVs that meet your every requirement. Check out our extensive range of Android, mirrored, outdoor, and bathroom televisions. Let our expert team help you choose a Smart TV package that will bundle all of your media together.

ANDROID BATHROOM TVs

Touchscreen Android TVs are connected to the internet and easy to use. Installing an Android bathroom TV gives your home an instant tech makeover.

BATHROOM TVs

All of our TVs are IP65 certified in order to withstand water damage. That means that you can lie back and relax in front of your favourite series, movie, or news channel.

OUTDOOR TVs

Coming soon to ever-expanding range. Enjoy alfresco entertainment in any weather, with bespoke TVs that are tough enough to withstand the elements.

BATHROOM TVs

Turning your bathroom into an entertainment hub is simple and quick with the mounting system included in any sarason tv purchase. Our bathroom tv wall mounting system is minimal and unobtrusive, guaranteeing that your media is the focal point – not the hardware.

“
*It couldn't be
easier to mount
a bathroom tv*”

Custom mirrored TVs for your home or office

Choose one of our custom mirrored tvs, designed to add sleek and sophisticated technology into any room of your home or business.

Framed mirrored TVs

By adding a frame to one of our custom mirrored tvs you can create an on-trend and stylish focal point in any room of your home or office.

Buying a waterproof bathroom mirror TV in the UK

We all know that television technology has undergone huge transitions over the decades. While earlier televisions were housed in a cumbersome box, lcd televisions are now the more popular option. Lcd (liquid crystal display) tvs are thinner lighter tvs that offer excellent resolution and state of the art viewing options.

There are a wide range of lcd televisions available in the market, designed to meet any user preference. Whether you plan to use your lcd tv in the bathroom to entertain your kids during bath time or you need a big screen lcd projector to use in a conference or meeting room, sarason has you covered.

One of our most popular bathroom tv in the uk is the 26 inch waterproof bathroom mirror lcd tv. Our clients really love the versatility and ease of use of this tv, as it can be used both as a mirror and tv (and so much more).

How to pick a waterproof LCD bathroom TV:

When you start shopping for an lcd television, there are a number of things you should consider, such as resolution, graphics, screen size and overall size of the unit. Noted below are important points that will help guide you towards the ideal lcd tv for your home.

Understanding the difference between outdoor tv models:

The three most common types of television today are the plasma, lcd and led options.

Plasma tvs create a picture by sending an electric charge to a small sheet of plasma cells.

Lcd tvs are made up of liquid crystals pressed between two glass plates and backed by a fluorescent lamp.

Leds - these are lcd tvs that utilise led backlighting (rather than cold cathode fluorescent backlighting).

The option that you choose should depend on what you want to use your bathroom tv for on a regular basis. Are you planning to watch a lot of news and chat shows? Any of the above should work for you. However, if you like fast moving action movies or plan to spend a lot of time gaming, you should consider going for a big screen lcd wall mounted tv.

That said, if you want to give your bathroom a pop of sleek style, a mirrored tv screen is the way to go. These can be used as a tv when you want to watch a film or tv, and a stylish mirror when not in use.

You always want to choose a tv set that has a contrast ratio that is higher than 600:1. If you are able to spend a bit more for a higher resolution, this is always a good choice.
